Superfund Long-Term Human Health Protection Worksheet

Definition: The Long-Term Human Health Protection EI documents the progress achieved towards providing long-term human health protection by measuring the incremental progress achieved in controlling unacceptable human exposures at a site.

Site Name: CORNELL DUBILIER ELECTRONICS INC.

EPA ID: NJD981557879

HE Survey Status: Insufficient Data to Determine Human Exposure Control Status

Estimated Under Control Date (If not under control):

Estimated LTHHP Control Date (If not under control): 09/01/40

Step 1. Is there sufficient known and reliable information to make an evaluation on human exposures at this site?

Answer: NO YES

Listing Reference Documents: 004 - ROD
004 RI/FS

No

Insufficient Data to Determine Human Exposure Control Status

Yes

Step 2. Have all human exposure-related cleanup goals been met for the entire site?

Answer:

Listing Reference Documents:

Yes

Long-Term Human Health Protection Achieved

No

No

Step 3. Are there complete human exposure pathways between contaminated groundwater, surface water, soil, sediment or air media and human receptors such that exposures can be reasonably expected under current conditions?

Answer:

Listing Reference Documents:

Yes

Skip to Step 5

Step 4. Are the actual or reasonably expected human exposures associated with the complete pathways identified in Step 3 with acceptable limits under current conditions?

Answer:

Listing Reference Documents:

004 risk assessment
RI/FS and ROD

No

Current Human Exposures Not Controlled

Yes

Step 5. Is the site Construction Complete, is the remedy operating as intended, and are engineering and institutional controls, if required, in place and effective?

Answer:

Listing Reference Documents:

No

Current Human Exposures Controlled

Yes

Current Human Exposure Controlled and Protective Remedy in Place

Step 6. Are there continuing exposures at the site?

Answer: NO

Answer "Yes" only if EPA (or a state or PRP) has extended all response actions and legal authorities to prevent unacceptable human exposures, yet exposures continue due to a refusal by the property owner(s) to participate in the remedy (e.g., refusal to accept a municipal water supply hookup) AND the region wishes to exercise its discretion to classify this site as Human Exposure Under Control, consistent with the requirements laid out in the Superfund Environmental Indicators Guidance (OSWER 9285 02, March 2008, pages 4-10 and 4-11).
